STANFIELD[®] HEAT PADS
for the pets you love

Heat Pads

Strong enough for pigs, perfect for your pet!

In 1973, Osborne's Stanfield® Heat Pads were developed as the first heat pad made for application in swine production environments. Since then, Osborne has manufactured hundreds of thousands of our signature orange heat pads and they are in use all over the world. They continue to be the safest, most economical way to promote good health and growth for small animals.

Our original "pig blankets" are made of fiberglass reinforced plastic which is far superior to the flammable plastics that cheap heating pads use. Our pads also distribute heat more evenly than competitor's pads: the heating element is patterned to radiate warmth across the entire length of the pad, not just at the center. The heating element is completely sealed in the pad making them water tight. Their proven, rugged design holds up in harsh livestock environments,

so you can rest assured they will deliver top quality performance for your favorite pets.

Put heat exactly where it is needed to improve your pets' health and reduce your costs! Completely eliminate bedding, along with its costs, sanitation problems, and labor. At maximum power, Osborne's Stanfield Heat Pads provide uniform heat that is 30 - 35° F (16 - 20° C) above air temperature. This creates a resting surface which is just right for many growing animals. The rigid, nonporous surface makes Osborne heat pads highly hygienic and easy to clean.

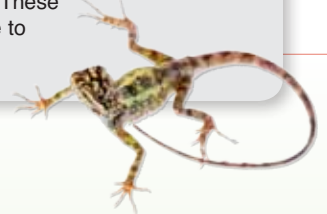

Along with worldwide popularity, they have earned CSA certification. To ensure unrivaled performance and your complete satisfaction, all of our heat pads are manufactured under strict ISO 9001 quality standards and come with a complete one year warranty.

Kimberly W. | Zoofari Director | California, USA

"We use Stanfield Heat Pads for many of our reptiles and small mammals. These heat pads are economical, low maintenance, and efficient. We will continue to use Stanfield Heat Pads and recommend these products to others."

Heat Pad for Dogs, Reptiles & More!

Stanfield Heat Pads provide the most safe, reliable, and economical heat for your kennel or your most important pet. They provide evenly distributed heat to block the cold, keeping your pet safely and gently warm through cold winter nights. Dogs, tortoises, snakes, and other animals thrive with a warm surface to lie on or against.

Raise Stronger & Healthier Animals

- Reduce room temperature without stressing growing animals.
- Promote healthful rest.
- Build disease resistance.
- Keep mothers cooler and more productive by putting heat where it is needed.

Sarah G. | Tortoise Owner | Maryland, USA

"I have tortoises who have been staying in a floor-heated shed thanks to your product. This product, by far, is the best heating pad for any outdoor animal."

Heat Pad Power Cord Protectors

Help extend the life of your heat pads by using Osborne Power Cord Protectors. Rugged and durable fiberglass reinforced-plastic ensures the Power Cord Protectors withstand the harshest environments. The Power Cord Protectors protect the cord from being chewed by growing animals and extends the life of the heat pad.

Catalog #: FH-00F150
Length: 16 in. (41 cm)

The F150 Power Cord Protector features a flared end, helping limit stress on the heat pad cord. When a sharp 90° exit is required for the heat pad cord, the F150 is the ideal candidate.

Catalog #: FH-00F152
Length: 24 in. (61 cm)

The F152 Power Cord Protector is ideal for protecting heat pad cords when fastened to the floor.

Set the Perfect Temperature and Go!

Osborne Heat Pad Controllers provide the option of controlling the temperature of a single or full system of Stanfield Heat Pads. Our line ranges from the wall-outlet F300 controller that manually controls a single heat pad to a feature-loaded controller system expandable to control an entire room of heat pads with a single control. Our controllers help you deliver the optimal temperature for healthy animal development and maximum energy savings!

No matter the number of heat pads you have, Osborne has the controller you and your pets need!

OSBORNE HEAT PAD CONTROL SELECTION GUIDE						
	Catalog Number	Description	AC Line Input Voltage (Volts AC - 50/60 Hz)	Maximum Current Rating (Amps RMS)	Output Capacity (watts)	Approvals
	FE-00F300	Single Pad, Manual Controller	115	3	300	UL Listed
	FE-00F911	Economy, Manual Controller Control two heat pads (up to 600 watts) with two built in outlets	120	5	600	
	FE-00F920A	Automatic Controller Maintain desired temperature of an entire system of heat pads (up to 2,400 watts)	120/240	20	2,400	CSA Listed
	FE-00F920D	High-Capacity, Automatic Controller Maintain desired temperature of an entire system of heat pads (up to 4,800 watts)	120/240	40 (20/circuit)	4,800	

Tammy S.
Cairn Terrier Breeder
Kansas, USA

For almost 10 years, I've used Stanfield Heat Pads for my Terrier puppies. Not only do my dogs love them, I love them! They have been one of the best purchases I've ever made for my kennel.
